

Verification protocol, damage direction: keep-dilution held-out

Data: notes/NOTES_e1b.md + NOTES_datasize.md (tier-2 notes tables; ridge points). Fit: prescription/fit_pilot.py (Huber+L-BFGS, frozen prereg). Fitted params in near-linear regime ($A=-141.8$, $\tau=21116 \rightarrow \sim\text{linear over } [0,100]$). Single seed except 33% (3-seed spread shown). NOTE: instruction labeled the .83 line 'untrained baseline'; source labels it a TRAINED floor reference arm — drawn with source label.
